Product Guide & Data Sheet

The EV1s

Where style meets function...

Discover the sensational EV1s, the newest star in our product range.

Boasting a sleek design, the EV1s caters flawlessly to residential needs seeking a minimalistic aesthetic, whilst being a game changer for commercial properties seeking untethered, cutting-edge chargers.

Untethered Flexibility...

The EV1s brings an untethered charging solution to the waEV-charge offerings, giving you the extra flexibility, you need. Say goodbye to cable length limitations, welcome the freedom to customise your charging experience.

Available in both 7.4kW and 22kW options, this is a fantastic solution to those wanting a cleaner aesthetic, but also encompasses all the amazing benefits and features of our other models. It's the perfect blend.

Make a Stand...

Whether you're looking to install an EV charger on your driveway or at your workplace, our bespoke charger pedestal provides a convenient and secure way to do so. Plus, with its sleek and modern design, it's sure to blend seamlessly into any space.

Choose waEV-charge's pedestal for an easy and hassle-free installation of your EV charger. With its sturdy and reliable construction, you can rest assured your electric vehicle will always be charged and ready to go.

The EV1

The Original.

The first of our EV charger range, the "EV1" released in 2022, with it's iconic orange branding. The EV1 charger is loved by many and offers a reliable & cost effective solution for those who like a bit more colour.

The EV1 is packed with many features including RFID, WiFi & Bluetooth and is powered by ev.energy, with features such as Solar Integration and much more... all at a cost effective price.

Convenience and Power.

The EV1 charger comes with a 5m tethered, Type 2 cable and is available in both 7.4kW & 22kW models, allowing for up to 10x fast charging when compared with the 3-pin slow charger.

Equipped with a status light and powered by the ev.energy app, the EV1 is reliable & powerful EV charger with it's extensive list of features.

We include a 3-year warranty and our aftercare team are available online 24/7, should you encounter any technical or support issues.

Powered by...

ev.energy's technology takes the EV1 smart charger to the next level, offering our customers access to the cleanest and cheapest charge, which is sensitive to the demand on the national grid.

With the ev.energy app, you can plan your charging to take advantage of off-peak electricity rates, which helps you save money while reducing your carbon footprint.

Additionally, the app updates you in real-time on your charging progress and estimated charging time, allowing you to stay informed and schedule your day accordingly.

The EV1i

Our Quality.

The waEV-charge EV1i charger has been built from the ground up with quality, safety & future EV technology at its core focus. Our charger is both TUV CE & UKCA quality certified, OZEV (EVHS & WCS) approved and features PEN protection with no requirement for an earth rod, allowing for a quick and easy install.

Our Installation.

The waEV-charge EV1i charger has been designed for a quick & easy install and can be carried out by any qualified electrician when accompanied with our installer guide & phone support. If you purchase our installation service, we aim to have your charger installed in as little as 5 days (standard install < 2 weeks).

Our Technology.

waEV-charge EV chargers are designed with the future in mind and are suitable for both commercial & domestic installs. All components can be easily upgraded with future EV technology and with minimal further investment. The ev.energy smart app includes features such as scheduled charging & energy/cost monitoring.

Our Aftercare.

The waEV-charge EV1i charger comes with a 3-year warranty from the day the unit is first used for charging. On new build sites, this is transferred to the home owner once the sale has completed and all warranty and aftercare information is detailed in our welcome pack should they encounter any technical issues.

Our Pricing.

Our pricing structure has been designed to work alongside you and your requirements. Whether you require a single EV charger for your home, 20 EV chargers for your office car park or 100+ EV chargers for your housing development, our sales team are on hand to design a pricing structure which works for you.

Our Service.

waEV-charge pride ourselves on customer service, with many of the team coming from a construction background. We therefore understand the challenges involved when building large developments or managing residential & commercial buildings and your dedicated project manager is on hand to answer & support your every request.

FEATURES

Powered by:

Full control in the palm of your hand.

Automatically charge your vehicle with the cheapest and cleanest electricity available in your area.

- ✓ Save money on your energy bills
- ✓ Track your charging costs and kWh
- ✓ Claim rewards for Smart Charging
- ✓ Integrates with your home solar
- ✓ Get award-winning customer support

Charge smart, drive happy

We optimise your charging to lower costs and carbon emissions automatically.

All the insights you need

See all your charges, filter by type and tap to get a full summary of each session - with info on energy, cost, emissions and more.

Watch the rewards roll in

Earn shopping and carbon-offsetting vouchers or get money off your energy bill with our Rewards scheme.

Powered by sunshine.

If you've invested in home solar panels, or are just about to, this one's for you.

- ✔ **Works with existing hardware**
Just tell us the size of your array and plug into self-generated solar power.
- ✔ **Free, green energy**
Charge with free solar instead of grid power to reduce your energy bill.
- ✔ **Make every kWh count**
Soak up and reduce or remove your reliance on dirty fossil fuels.

Two powerful options

Solar Only

Ramp the electric current of your charge up or down to meet your self-generated solar output for a truly zero-cost, zero-carbon without using energy from the grid.

Solar Smart

Charge with Solar Only when the sun is shining, then pull in grid energy when required to ensure a full charge. You get the cheapest, greenest charge every time, guaranteed.

ev.energy includes:

- ✔ **Smart Charging**
- ✔ **Charge History and Summary**
- ✔ **Rewards**
- ✔ **Statistics**
- ✔ **Charger Lock**
- ✔ **Friendly Support**

Add ev.energy SOLAR from £50 per year

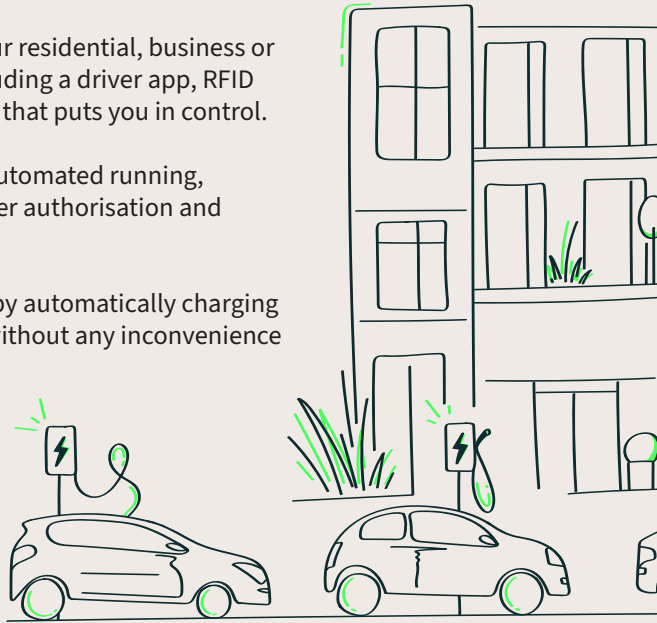

- ✔ **Solar Only Mode**
Match the charge rate of your vehicle to the amount of solar power being exported to the grid. This allows you to entirely self-consume the solar power you generate.
- ✔ **Solar Smart Mode**
Combine your zero-carbon Solar energy with your energy tariff to ensure your car is always charged for when you need it using the cheapest and greenest energy possible.
- ✔ **Solar Saving Guarantee**
With our Sunshine Promise, we guarantee you'll save at least £50 in the next 12 months or sooner. If not, we'll refund you the difference.

Shared EV Charging, without the fuss.

Get everything you need to run your residential, business or commercial EV charging sites, including a driver app, RFID cards and a management platform that puts you in control.

Save hassle with easy set-up and automated running, including seamless payments, driver authorisation and carbon tracking.

Then reduce your electricity costs by automatically charging your sites at the cheapest times - without any inconvenience to drivers.

Who is Shared EV Charging for?

**Workplaces
& Fleets**

**Apartment
Buildings**

Municipalities

The screenshot displays the PANDO web dashboard for a site named 'Bayliss Heights'. The dashboard includes a sidebar with navigation icons and a main content area with several key metrics:

- Revenue:** 2,148.00\$, showing a 19.89% increase vs. Last Month.
- Charging Sessions Count:** 57, showing a 12.15% increase vs. Last Month.
- Total Energy Charged:** 828.55kWh, showing a 5% increase vs. Last Month.
- Maximum Load Limit:** 100A.
- Live Current:** 15A.

Below these metrics is a table of charging stations with columns for Connectivity, Serial number, Model, Current Load, and Authorise Charging. The table lists several stations with their respective statuses (Online/Offline) and load levels.

Overlaid on the dashboard is a mobile app interface showing a summary for a smart charge session on Tuesday 24 Aug. The app displays a total cost of £4.68 and a summary of the session:

- Rate:** 9.8p/kWh
- Energy delivered:** 47 kWh
- Total cost:** £4.68
- Savings:** You saved £2.16 by smart charging.

The app also shows a charging duration of 09:34 AM on Wednesday 25 Aug 2021.

Pando Features

- Easy setup
- Hardware Agnostic
- Solar Integration
- Collaborate
- OCPP
- Car Integration
- Full Cost Control
- Virtual Power Plant
- Load Management
- Partner API
- Driver App
- Carbon Accounting
- Utility Tariff Integration
- Driver Authorisation
- Charging Reports
- Smart Charging
- Secure
- Remote Configuration

Tap Electric for Drivers

Simple, reliable & cheap. That's charging on Tap

Easily pay for EV charging at home,
at work and on the road

Getting started with the app

FOR DRIVERS

1. Download the app,
2. Start charging,
no registration required
3. Pay-as-you-go or subscribe
for discounted charging

One app for all your charging

AT HOME OR AT WORK

When your landlord or employer
chooses Tap to collect payments,
subscribe for best value

On the road

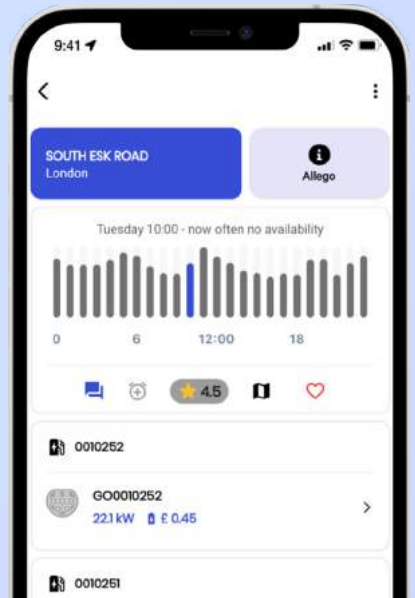

Use Tap seamlessly at our ever-growing
network of public chargers

Why choose Tap Electric?

- ✓ Smart notifications like "full battery"
and "charger available"
- ✓ P2P and group messaging
- ✓ AI-powered availability predictions
- ✓ Real-time cost calculations and
auto-stop on max cost
- ✓ Find the cheapest chargers nearby

Scan here to download the app
or visit tapelectric.app

Tap Electric for Owners

Simple, reliable & free. That's charging on Tap

Collect payment for your EV charger
with an app that drivers love

Getting started with the app

FOR OWNERS

Always free

Connect your charger in one minute

Set your tariff and configure who gets access

Connect your bank account

One app for all your charging

FOR DRIVERS

Download the app

Start charging no registration required

Pay owner fee + transaction fee

Tap subscription

TXN fee from 0%

Pay-as-you-go

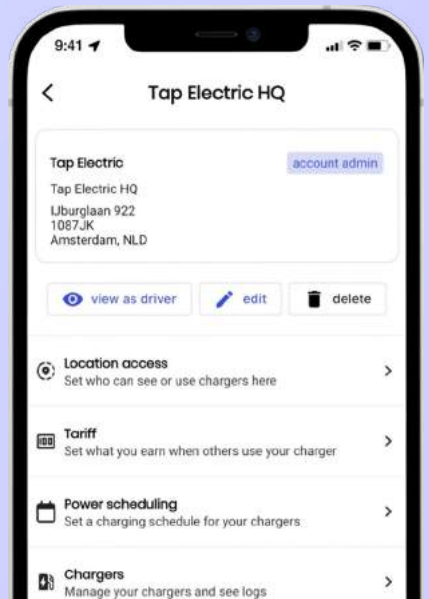

TXN fee 10%

Why choose Tap Electric?

- ✓ You decide what you earn
- ✓ You control who gets access
- ✓ We pay out to you every month
- ✓ It's always free for owners
- ✓ Drivers love our great features and network of public chargers

CASE STUDY

Westfield Mall London, Toshi

Client:

Toshi Ltd (EV Delivery Company)

Site:

Westfield Mall London, UK

Charger:

waEV-charge EV1

Size:

19 chargers

Toshi operates a luxury goods EV delivery fleet from Westfield Shopping Centre, London. Their requirement was for their fleet to be charged in a public, accessible underground car park.

Pando for Shared EV Charging was implemented to manage the site. Employees are supplied with RFID cards to authorise their charging sessions.

Charging data can then be exported from Pando for remote operational and accounting reporting.

WAEV-CHARGE EV CHARGERS ARE COMPATIBLE WITH ALL PLUG-IN ELECTRIC VEHICLES
